

BEST AIRCOTECHNIEK

Always the best climate

LG

Air conditioning

Cooling in summer, heating in winter. A comfortable, energy-efficient indoor climate all year round with LG Dual Inverter. Smart to control, whisper-quiet and reliable.

LG wall-mounted model · indoor + outdoor unit, remote control & app

COOLING

HEATING

A+++ EFFICIENT

WIFI

Comfort that works all year round

A modern LG air conditioner is much more than cooling for a few hot days. It is a heat pump: in summer it cools and dehumidifies your home, and in spring, autumn and winter the same unit heats quickly and efficiently. So you always have the temperature you want, at the touch of a button or via the LG ThinQ app.

Cooling & dehumidifying

A pleasant temperature and less humidity on hot days, fast.

Heating as a heat pump

Affordable supplementary or primary heating, even in frost.

Energy-efficient (up to A+++)

High SEER/SCOP values: lots of comfort for little power.

Smart via WiFi & app

Control and schedule your unit anywhere with the free LG ThinQ app.

Whisper-quiet

From 19 dB(A): barely audible, even at night.

Comfortable airflow

Dual Vane and Soft Air distribute the air evenly through the room.

Which model suits you?

All four models cool and heat and share the same smart basics. They differ mainly in efficiency, air purification and smart features. On the next page you can see them side by side.

Four models, something for everyone

All LG wall-mounted models cool and heat, run on R32 and have WiFi built in. Below you can compare the key differences between the four models at a glance. Full specifications are on the next page.

STANDARD PLUS ENTRY MODEL	AI AIR SPECIAL MID-RANGE	DELUXE COMFORT-PLUS	PREMIUM TOP MODEL
			
The affordable entry choice: compact, quiet and reliable.	Automatic comfort with AI Air mode and smart energy management.	Extra air purification and a pleasant, indirect airflow.	The most efficient top model with the richest sensors and filtering.

Which LG suits you?

	Standard Plus	AI Air Special	Deluxe	Premium
Level	Entry	Mid-range	Comfort	Top
Energy label cooling	A++	A++	A+++	A+++
Energy label heating	A+	A++	A++	A+++
SEER (up to)	6.4	8.3	8.5	9.5
SCOP (heating)	4.0	4.6	4.6	5.10
Air purification	Ionizer+ + allergy filter	Allergy filter standard	Ionizer++ + allergy filter	Ionizer++ virus Dual Protection
Smart features	Auto Clean 19 dB sleep mode	AI Air mode kW Manager	Soft Air Dual Vane	Human sensor Dual Vane, Jet Cool

What do these figures mean?

SEER

Seasonal Energy Efficiency Ratio: how efficiently the unit cools across a whole season. Higher is better.

SCOP

Seasonal Coefficient of Performance: the same, but for heating. Higher is more efficient in winter.

A+++ / A+

The energy label. All four are efficient; A+++ (Deluxe and Premium) is the top.

Capacity & room size

Capacity	Suitable up to (volume)	Floor area*	Typical room
2.5 kW	± 90 m ³	± 35 m ²	Bedroom / small room
3.5 kW	± 120 m ³	± 46 m ²	Living room (average)
5.0 kW	± 180 m ³	± 70 m ²	Large living room / open space
7.0 kW	± 240 m ³	± 92 m ²	Very large or high room

*Floor area is a rule of thumb at approx. 2.6 m ceiling height and average insulation. With lots of glass, high ceilings or a corner/top-floor home we recommend a larger capacity. Best Aircotechniek will gladly make an exact calculation for your home.

A solution for every home

Beyond wall-mounted models

Does a wall-mounted model not fit, or do you want to cover several rooms? LG offers more configurations. We advise what works best in your situation.

Multi-split

Multiple indoor units on one outdoor unit, ideal for several rooms.

Floor-standing

Standing unit, convenient where wall space is limited.

How it works at Best Aircotechniek

1

Free advice

We assess your situation and advise the right model and capacity.

2

Clear quote

A clear all-in price, without surprises.

3

Professional installation

Certified (F-gas) installation, neatly finished.

4

Warranty & maintenance

Installation warranty and yearly maintenance available.
